-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Specification

1. The spacing of the lines of the specification is such as to make reading and entry of amendments difficult. New application papers with lines double spaced are required.

The abstract of the disclosure is objected to because the applicant has no record of other pending applications or patents; therefore, the section "CROSS-REFERENCE TO APPLICATIONS" must be deleted. Correction is required. See MPEP § 608.01(b).

In "DRAWING DESCRIPTION", the applicant must replace "Fig 20 A, 22A, 22B, 22C, 22D, 22E, 22E, 22F, 20a-e and 22a-f with figure number; e.g., Figure 1, Figure 2, Figure 3...Figure n.

DETAILED ACTION
Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Bessa (Bessa et al.; US Pub. No.: 2003/0,096,642 A1).

Regarding claim 1, Bessa teaches of a communication unit that obtains at least part of its voltage or current source, indirectly or directly, through light energy through the use of (paragraph 0002; where a cellular phone's battery is charged with solar energy): a) a unit for converting energy to electrical directly (paragraph 0011; "photovoltaic cell" converts solar energy into electrical energy directly) b) a unit for converting solar energy to electrical charge for storage in a battery device (paragraph 0011; where the photovoltaic cell converts the solar energy into electrical energy and stores it in a battery).
